

validate表单验证工具

此插件旨在简化表单验证功能，项目中会遇到点击提交按钮验证表单正误、和表单blur事件检验表单

运行环境IE6\7+

validate验证工具基本用法

逐个验证表单

```
<label class="label-validate" data-class="label-validate">
  <input class="input" data-pattern="/(^|\s)sex(\s|$)/ig" data-right-text="输入sex正确"
data-error-text="输入sex错误" data-class="validate" placeholder="输入sex" type="text"/>
  <div class="error-img"></div>
  <label for="" class="error"></label>
</label>
<script>
$( "[data-class='label-validate']" ). validate();
</script>
```

一次验证所有表单和逐个验证

```
<div id="fm">
  <label class="label-validate" data-class="label-validate">
    <input class="input" data-pattern="/^(\\s)sex(\\s|$)/ig" data-right-text="输入sex正确"
data-error-text="输入sex错误" data-class="validate" placeholder="输入sex" type="text"/>
    <div class="error-img"></div>
    <label for="" class="error"></label>
  </label>

  <label class="label-validate" data-class="label-validate">
    <input class="input" data-pattern="/^[0-9]{3}$/" data-right-text="输入3个字符正确"
data-error-text="输入3个字符错误" data-class="validate" placeholder="长度为3的字符" type="text"/>
    <div class="error-img"></div>
    <label for="" class="error"></label>
  </label>

  <label class="label-validate" data-class="label-validate">
    <input class="input" data-pattern="/^[A-Z]+$/ " data-right-text="输入英文大写"
data-error-text="输入英文大写错误" data-class="validate" placeholder="大写字母" type="text"/>
    <div class="error-img"></div>
    <label for="" class="error"></label>
  </label>

  <br/></div>
  <button id="example">提交</button>
</div>

</div>
<script>
  $(function() {

    /* 单个执行校验 */
    $('[data-class='label-validate']").validate();

    /* 对example绑定校验事件 */
    $('#example').bind('click', function() {

      var res=$("#fm").form({"checkValid":true});
      /* res返回ture或false */
      console.log(res);
      if(res){
        console.log('form校验成功!');
      }else{
        console.log('form校验失败!');
      }

    });

  });
</script>
```
